

Electronic BATTERY MANAGER for total maintenance of WET,GEL,AGM, MF, SPIRAL, START-STOP batteries at 6/12/24V and for support activities when intervening on vehicles in workshops, repair shops and car dealer premises. The innovative Power Stream technology guarantees better performance, up to 50% more than traditional battery chargers. The Pulse Tronic technology guarantees optimal battery charging over 8. Doctor Charge 30 carries out 4 functions: 1. automatic charge and maintenance of batteries with PULSE TRONIC technology, even in difficult environmental conditions (low temperatures); 2. battery test such as voltage at terminals, starting capacity (CCA) and operational check of the vehicle alternator; 3. recovery of sulphated or very discharged batteries, and recovery of optimal operation with periodic regeneration; 4. stable power supply source for battery changes (to protect the on-board electronics), for diagnostic activities (operation checks carried out on the vehicles), for keeping the batteries of display vehicles in showrooms operational. Based on the SMPS (Switch Mode Power Supply) Technology. In case of black-outs or repetitive uses Doctor Charge 30 can set itself at the last settings carried out, furthermore the cables can be calibrated according to their type (different lengths and/or sections). Many protections available.
